

CEC-Cote

Cut Edge Corrosion Coatings

CEC-Cote is a fast curing, two part cut-edge corrosion repair system that has been designed to be applied wet on wet. CEC-Cote will cure within 30 minutes. Minimal preparation work is needed and no primer is required. The speed of the application of the CEC-Cote system along with its excellent bond strength offers unrivalled benefits in its class.

Benefits:

- Can be applied onto a damp substrate
- Minimal preparation required
- Year round application possible
- Quick and easy to apply – reducing scaffolding costs
- Wet on wet application
- Can be applied at -5°C
- Single coat application
