

Clearcote

Clearcote is a liquid applied, UV stable clear coating that has been specifically designed for use on glazing. It is formulated using fast drying, solvented, synthetic resins that do not attack plastics. Clearcote systems protect roof glazing from further infra-red and ultra violet damage and have shatterproof qualities. Clearcote is provided with guarantees of up to 15 years.

Benefits:

- Flexible, cold applied rapid & simple application
- Overcoat in less than 1 hour in ventilated conditions
- No hot works insurance required
- Tins can be opened and resealed with no surface skinning
- Resistant to industrial and environmental pollution
- Clear finish (not opaque)
- Anti-shatter properties
- Can be reinforced to repair cracks
