

Castle - XP 2435 - PU Adhesive - Rubber Tiles

Formulated to adhere Castle Rubber Promenade Tiles to almost all flat roof and balcony surfaces.

As rubber tiles have a higher thermal coefficient of expansion than our GRC products we have developed a more flexible PU adhesive to adhere our Rubber Tiles. This results in an effective and practical fixing method which can be used in damp and humid conditions.

XP 2435 PU adhesive is supplied in 1 litre bottles with nozzle. The adhesive is applied by simply cutting the nozzle to get a 3-4mm bead and applying as per the diagram below. It is very important that the adhesive is applied as per the instructions.

One bottle of XP 2435 will adhere approximately 16 tiles or 4m².

For safety precautions see container label or data sheet.

Unit C1, M62 Trading Estate, Larsen Road, Goole, East Riding of Yorkshire, DN14 6XF
